FROM

Grant Requesting Department/Division: PPW Surface Water Management

Project Title: Clarks Creek Restoration Plan

Project Purpose: To create a plan that protects core salmonid habitat in Clarks Creek.

GRANT PROGRAM

<input type="checkbox"/> Federal	<input checked="" type="checkbox"/> State
<input type="checkbox"/> Formula Grant	<input checked="" type="checkbox"/> Competitive Grant

GRANT PROGRAM TITLE/DESCRIPTION

Details:
(use additional paper if necessary)

- This funding would develop and implement The Clarks Creek Restoration Plan (CCRP)

-The CCRP is a solution to the TMDL that Department of Ecology issued Pierce County for Clarks Creek.

- The CCRP describes in detail the methods and models used to evaluate the capital projects and programmatic actions the County is seeking to apply to honor the dispute resolution agreement between Department of Ecology and Pierce County.

Due date of Grant Application:

March 30, 2018

Grant Application

Section Name	SWM - Engineering Services	Date	12/12/2017
Project Name	Clear Creek Floodplain Restoration		
Requester	Harold Smelt		

Grant Information

Granting Agency	Puget Sound Partnership
Name of Grant	Near Term Action
Amount of Grant	\$5,000,000
Grant Match Amount	None
Source for Local Match	
Other Resources (staff)	0
Date when Funds are Available	June 2018
Other Information	SWM has received over \$1,200,000 from this funding source since 2016.
Date when Funds must be Expended	4 years from award date

Project Information

1) Project Description (Please provide a brief description) The primary objective is to minimize the impact of flooding related to the back water created by the confluence of Clear Creek and the Puyallup River during flood events. The proposed project also provides refuge and habitat for critically endangered juvenile Spring Chinook salmon and other associated wildlife in the lower Puyallup River system. The components of the project are reducing/eliminating flood risk for the Clear Creek community in a way that restores critical habitat.
2) Identify the adopted plan the project is included (If not within an adopted plan, explain) The Clear Creek project is identified in the Pierce County Flood Hazard Management Plan
3) Identify the priority ranking the project received in the approved plan. (If not a top ranked project, explain) The Clear Creek project was ranked in the top 3 projects for the Puyallup watershed.

Grant Application

Section Name	SWM - Planning and Partnerships	Date	01/04/2018
Project Name	Riparian/Land Cover Change Analysis and Decision Support System		
Requester	Anne-marie Marshall-Dody		

Grant Information

Granting Agency	Puget Sound Partnership
Name of Grant	Near Term Action
Amount of Grant	\$225,000
Grant Match Amount	None
Source for Local Match	
Other Resources (staff)	Staff time will be charged to existing grant (ongoing program).
Date when Funds are Available	June 2018
Other Information	SWM has received over \$1,200,000 from this funding source since 2016.
Date when Funds must be Expended	4 years from award date - funding could come anytime between 2018-2022

Project Information

1) Project Description
(Please provide a brief description) The Riparian/Land Cover Change Analysis and Decision Support System (DSS) will be a GIS-based tool to support protection and restoration of riparian corridors, floodplains, and nearshore habitats in WRIA 10. It will identify areas of high solar impact, allowing for prioritizing actions to reduce stream temperatures. The model will include WDFW High Resolution Aerial Imagery Change Detection (HRCD) data; other modeling efforts (TerrainWorks, VELMA) will be investigated for potential integration into the DSS. It will be used to help stakeholders track changes over time and fill important data gaps in the South Central LIO 5-year Ecosystem Recovery Plan, WRIA 10 and the Region. It will provide regional and watershed specific monitoring results for Chinook Monitoring and Adaptive Management. The DSS will be developed through collaboration between the Lead Entity, WDFW HRCD Team and watershed stakeholders.
2) Identify the adopted plan the project is included
(if not within an adopted plan, explain) The project is identified as a gap in the Puget Sound Partnership Chinook Monitoring and Adaptive Management Framework for WRIA 10. This is a planning document for the Salmon Recovery Lead Entity, developed by the citizen and technical advisory committees of the Lead Entity.
3) Identify the priority ranking the project received in the approved plan.
(if not a top ranked project, explain) The projects identified with the Puget Sound Partnership Chinook Monitoring and Adaptive Management Framework were not ranked or scored.
