

May 7, 2019

I am Heidi White and am against the proposed ordinance 2019-105. I am sure that everyone that has worked on this ordinance has worked hard, but the problem is the transparency to the public. I feel that the public that pays for this park, Chambers Bay, have not been informed very well or at all. I only heard about this project this year. With that being said this process should not be voted on today and several more community meetings that are in the evening should be brought to the public before a decision is made, so you can you can hear more of what the people want. To me it is clear what most people want, leave it alone. Remember we elected you to represent us and the people have spoken that they would like this park left as an open space like it is now with no trail systems being rerouted, the 9th tee being disturbed or different than it is now, no ample theater and no long term rentals or villas being built to only serve people that can afford it, which will be very few in our community and the people that visit.

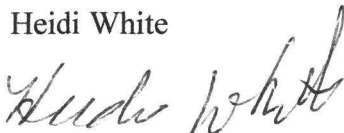

Please keep in mind the environmental impacts on the wildlife that this will have.

I do not know how this park could possibly be losing money as when I walk the trail system I do not see golfers, but approximately \$200.00 for every body with a golf bag. Are you hearing the public or the developers? This park is for the people not for someone to make a profit off of with long term ground lease agreements.

The trail system and golf course needs to be kept as is with never any restrictions on public access. We do not have to build on every open space that there is especially this space that is so beautiful and used by the general public. I hope that the UP council is listening to this also.

Thank you and I hope you are listening to the people,

Heidi White
